KA-BAR° Digital Downloads70					production of the iconic KA-BAR USMC Fighting/Utility knife. Running time: 2:27

When you see this icon, know that these KA-BARs are being made by family, friends and neighbors right here in the USA.

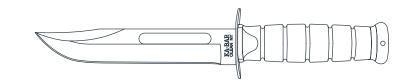

When you see the Video Review icon, go to our YouTube or Vimeo channels where you can see product videos along with designer interviews.

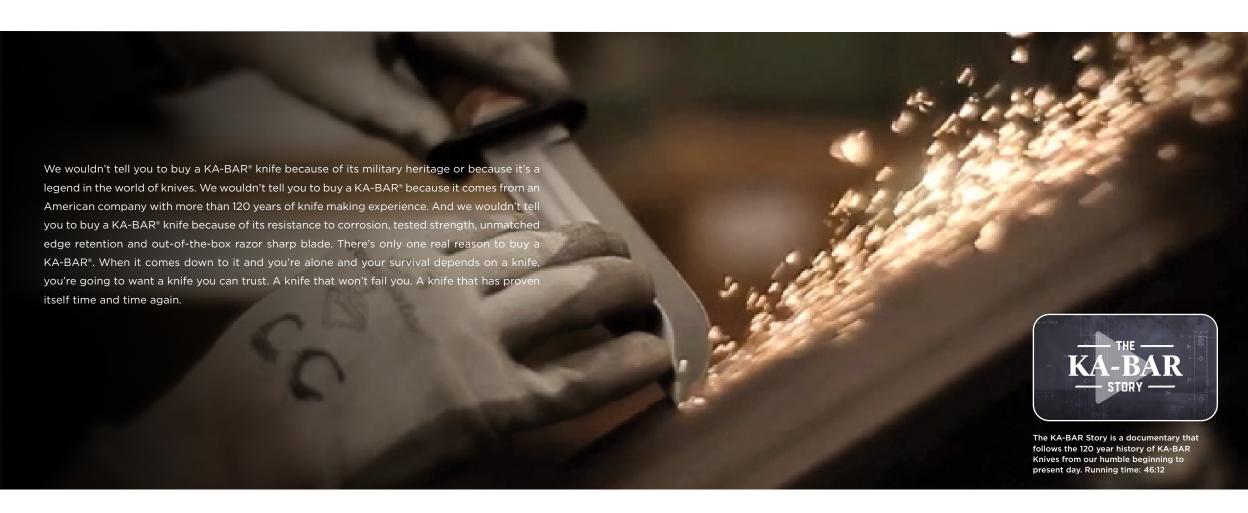

1217*

When you see the asterisk next to a style number, this indicates that the product is also offered in a clam pack packaging option for retail display.

The 1219C2, a Fighting/Utility Knife adopted by the United States Marine Corps, was made by a number of different companies, including the Union Cutlery Company of Olean, NY. Union Cutlery marked their knives with their "KA-BAR" trademark. Soon, all fixed blades, regardless of manufacturer, were being referred to as "Kabars". By the end of World War II, the name KA-BAR held far greater recognition than Union Cutlery. As a result, Union Cutlery changed its name to its famous trademark KA-BAR in 1952.

STATE & UNION KNIVES

Inspired by the craftsmanship, quality and attention to detail that was in each and every piece by those before us.

We aim to give you a product that embodies our inspiration, that allows us to return to our roots and serves as a reminder that although we are evolving, we have not forgotten where we started. We are proud of our heritage and continue our legacy while working with some of the most elite knife designers in the industry. These special relationships result in a collection of KA-BAR® manufactured knives designed and authenticated by the leading outdoorsmen, survivalists, uniformed professionals and military experts in the U.S.

1313SF USSF SPACE-BAR Knife

The 1313SF SPACE-BAR introduces the tried-and-true KA-BAR Fighting/Utility Knife to a post-orbital world. Made with battle-tested 1095 Cro-Van steel, the blade has a grey powder coating and is marked "USSF" and "KA-BAR". For complete specs see page 20.

2484SF USSF Bridge Breacher Tool

Picture this: you're out for a leisurely space walk and you realize you forgot your keys to the ship. Enter the Bridge Breacher. The 2484SF Bridge Breacher is one solid piece of 1095 Cro-Van steel coated in grey powder coating.
For complete specs see page 21.

1480SF USSF TDI Astro MP

When it is always dark there is bound to be some wild nights. The Astro MP is prepared to help you handle any space shenanigans. Its quick deployment and high visibility color saves the day. For complete specs see page 20.

5698SF USSF Corser Folder

The 5698SF Corser Folder has a tanto blade shape and reversible pocket clip. The lockback knife has a blue GFN-PA66 hard plastic handle and an AUS 8A stainless steel blade that is coated in grey powder coating. For complete specs see page 21.

1292 D2 Extreme Straight Edge

We heard your requests for our D2 Extreme with a straight edge and are happy to oblige. Made in Olean, NY with D2 Tool Steel, a steel known for its toughness. For complete specs see page 17.

1274 Folding Saw

The right tool for the right job is a recipe for success. Enter the KA-BAR Folding Saw. Designed for the jobs that go beyond a knife. For complete specs see page 49.

1494 TDI Ladyfinger

Small, sharp and compact, the Lady Finger is ambidextrous and can easily be stowed away in a bag, glovebox, pocket or hooked to a belt or pack. The hard plastic sheath is designed to be carried in multiple configurations. For complete specs see page 32.

5350/5351 IFB Knives

Strong and affordable, our IFB Fixed Blades are designed to work without breaking the bank. Backed by our limited lifetime warranty, the IFB Fixed Blades are ready to lend a helping hand. For complete specs see page 51.

2491 TDI Pocket Strike

The TDI Pocket Strike is a comfortable, convenient, and concealable fixed blade. The hard plastic sheath rests inside of your pocket and clips to the outside of your pants. The ring loop makes it easy to find and deploy. For complete specs see page 33.

9926 Sharpener

Sharpen your knives anywhere with the KA-BAR Sharpener. The compact KA-BAR Sharpener stows away in a pocket or pack and only requires a flat surface and dull knife to use. For complete specs see page 61.

BK40 Becker Folder

The first Becker folder from KA-BAR, the BK40 lives up to the fixed blade Becker Knives. Featuring a streamlined pocket clip that is reversible and can be worn for tip-up or tip-down carry. For complete specs see page 38.

9927 'Za-Saw Pizza Cutter

Show your pizza who's the boss with the KA-BAR 'Za-Saw, our USA-made pizza cutter. Featuring a Creamid handle and 440A stainless steel wheel.For complete specs see page 61.

4062D2 Dozier D2 Folding Hunter

Bob Dozier is known in the knife industry as "Dr. D2" for his use of D2 steel in his custom knives. We are proud to bring Bob's steel of choice to an affordable, production EDC folding knife. For complete specs see page 42.

9928 Dessert Destroyer Ice Cream Scoop

Destroy the toughest of desserts with the KA-BAR Dessert Destroyer Ice Cream Scoop. Made in America with food and water safe Creamid. For complete specs see page 61.

25 Return to Table of Contents

The legendary story of the Eugene Stone knife lives on with this limited offering by KA-BAR Knives and Bill Stone. Using his father's original casts to make the famous skull and cobra handles, Bill Stone touched each and every one of these knives, hand finishing them before sending the blades to be blued. The end result is stunning.

The handle is a gorgeous, shiny silver while the blades are a beautifully rich, deep shade of blue. Sold with JRE semi-custom leather sheath and Gerstner golden oak case with nickel corners, hinges and draw latch.

Each knife comes with a certificate of authenticity, a DVD of Bill Stone telling his father's story and how he came to work with KA-BAR on this limited edition project, and custom-designed packaging.

Designed by R. Lee Ermey, also known as "The Gunny". This was the last project The Gunny worked on before his passing in 2018. Created to be used in any and all terrains and situations, the Gunny Knife is made in the USA.

The pile side of the blade is marked with R. Lee Ermey's official "GUNNY APPROVED" logo at his request.

A portion of sales of the Gunny Knife will be donated to the Fisher House Foundation, an organization that was near and dear to R. Lee Ermey.

Features:

• Made in USA

John Ek wanted to contribute to the American war effort during World War II. From his shop in Hamden, Connecticut, Ek built custom knives specifically for Soldiers, Sailors, Airmen, and Marines. He even built a knife for the Commander-in-Chief, American President Franklin Roosevelt.

Mr. Ek, who also employed disabled Americans, produced six models of knives beginning in 1941. He referred to these knives as "Ek Commando Knives" as they were purpose-built for close quarter use that would become a hallmark of the US Marine Raiders, US Army Rangers, First Special Service Force, and Office of Strategic Services' Operational Groups.

Americans have carried Ek Commando Knives in World War II, Korea, Vietnam, Afghanistan, Iraq, and countless other locations in between. John Ek's knives live on today through Ek Commando Knife as a testament to his ideas, skills, and unflinching patriotism.

Features:

- Water Resistant
- Product Made in Spain

KA-BAR | GLOSSARY OF TERMS & BLADE SHAPES

1095 Cro-Van Steel

Easy to sharpen carbon steel used in many American-made KA-BAR Knives.

425 High Carbon Stainless Steel

Provides high corrosion resistance, high strength, and ease of sharpening. Corrosion resistance and overall durability make this steel an excellent choice of hard use knives.

440A Stainless Steel

A high-carbon stainless steel used in many American production knives.

American Hone

Sister company to Union Cutlery Company. Specialized in sharpening products. R. Emerson Brown was president of company.

Blister Pack (BP)

A cardboard backed clear-front packaging option that allows products to be hung on peg board for retail merchandising.

Brown Brothers

The first knife-related company started by Wallace Brown alongside his brother R. Emerson Brown.

Clam Pack (CP)

A clear plastic packaging option that allows products to be hung on peg boards for retail merchandising.

Creamid*

Food and water approved polymer (plastic).

Cryogenic Quenching (CR)

The process of freezing blades to improve blade performance.

D2 Steel

A high-carbon, high-chrome tool steel often used for blanking dies. This steel has excellent edge holding ability. Use diamond or ceramic to sharpen.

Danforth Brown

Former President of Union Cutlery and KA-BAR. Son of Wallace Brown. Guided company through the Great Depression and World War II.

Epoxy Powder Coating

A coating process that protects blades from corrosion and also makes them nonreflective.

Flat Ground

A grind that tapers from the top of the blade down to the cutting edge. Also known as a "V" grind.

Frame Lock

Similar to the side lock or liner lock, except the lock is part of the handle.

Full-Length Tang or Full Tang

Extension of the blade steel that runs completely through the handle to the end of the knife.

Fuller or Blood Groove

A longitudinal groove on the blade of a knife

G10

An extremely durable material made of woven fiberglass soaked in epoxy resin, then highly compressed and baked.

Glass-Filled Nylon (GFN-PA66)

Material used to make sheaths. Nylon is reinforced with glass particles and other materials to provide strength and durability while still allowing some flexibility.

Grilamid* FWA

Food and water approved polymer (plastic).

Guard

Also known as a hilt, is the material that separates the handle and the blade. Serves to keep the hand from slipping on the blade when cutting. Can be single or double.

Hollow Ground

The ground surface of the blade is concave. Used to create a fine cutting edge.

lohn Brown

A founder of what is today KA-BAR Knives. Father of Wallace and R. Emerson Brown. Involved in a number of cutlery businesses including Union Razor, Union Cutlery, John Brown Sons, and American Hone

Kraton G* Thermoplastic Elastomer

Referred to simply as Kraton* or Kraton G*, is a man-made material resembling rubber that can be molded into knife handles. Provides a non-slip grip. Trademark of Kraton Polymers Group of Companies.

Liner Lock

A locking mechanism that features a tab cut out of the liner which is used as a stop to lock the blade in an open position. To close, the liner tab is pushed back to its original position.

Lockback

A folding knife that has a lock release on the back of the handle.

Manufacturer's Suggested Retail Price

The price at which the manufacturer recommends retailers sell their product. Some sellers may sell above, at, or below this price. This is not determined by the manufacturer.

Micarta*

A man-made material, made by layering resin and cloth. Used to make very fine knife handles. Westinghouse trademark.

MOLLE

An acronym for Modular Lightweight Load-carrying Equipment.

Powdered Metal

A process used to make shaped metal pieces. Fine metal particles are molded under pressure and then fused under high heat. Also known as sintered metal.

Rockwell Hardness (HRC)

An industry scale used for measuring the hardness of blade steel. The higher the reading, the harder the steel. Written as HRC or RC followed by a range of numbers.

S35VN Steel

A high end stainless steel known for its edge retention and toughness.

Swedge

A faux double edge on the blade of a knife. Excellent for reducing the weight of the blade and balancing.

TPR (Thermoplastic Resin)

Thermoplastic Resin is used for making handles. On KA-BAR products like the Kukri #1249, it has a firm but still "giving" feel.

Tidioute Cutlery Company

A former knife company in Tidioute, PA. May have originated as far back as 1874, though we only have records dating to the late 1890s. Formed the foundation of what is today KA-BAR Knives.

Ultramid*

Trade name for hard plastic-like material used to make handles and other products requiring a more rigid stability.

Union Razor

The sales company of Wallace Brown in the 1890s. Would later absorb the Tidioute Cutlery Company to manufacturer knives in the early 1900s.

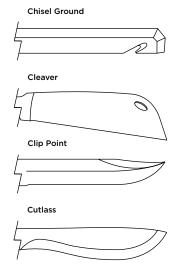

Union Cutlery

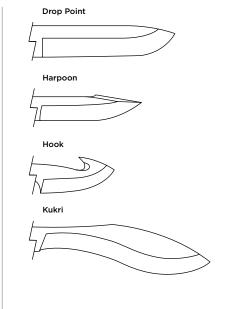

To more accurately reflect their diverse product line the name Union Cutlery Company was adopted. This name replaced Union Razor Company.

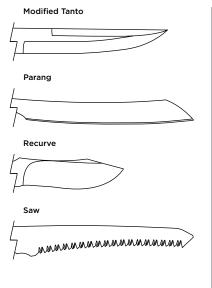

Zytel*

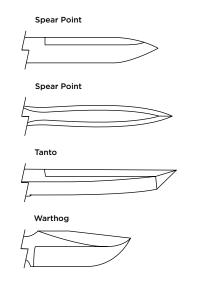

A glass-filled nylon material used in making handles for knives. DuPont trademark.

KA-BAR® Blade Shapes

64 — 65

KA-BAR° | SIZE COMPARISON CHART

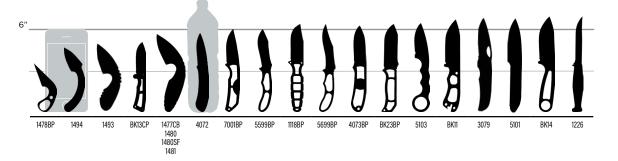

This size chart is a visual reference and size comparison chart of all our products in relation to some everyday items.

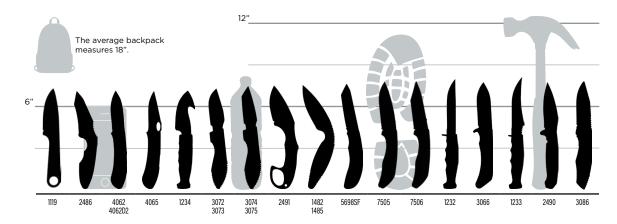

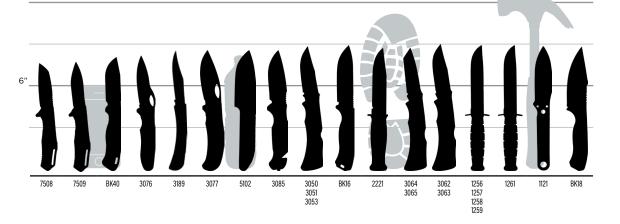

The average 16.9 oz water bottle measures 8" in height.

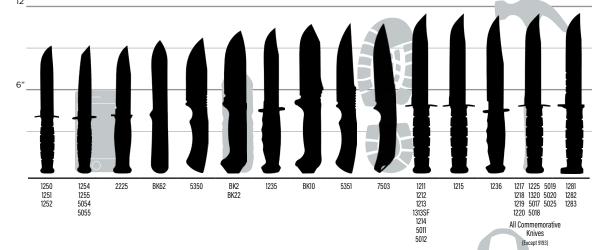

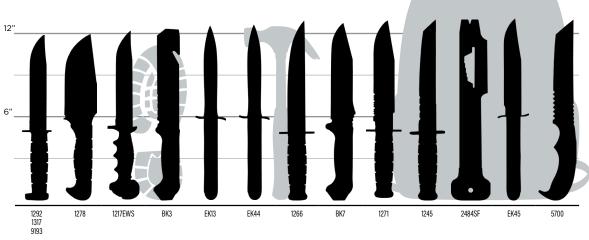

The average household hammer measures 13".

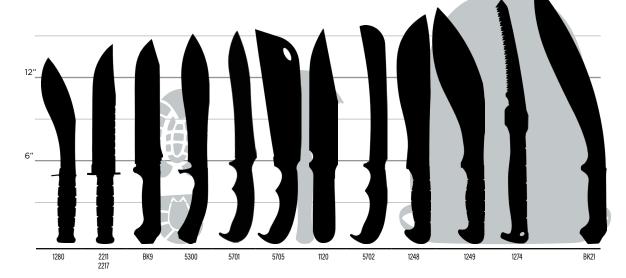

KA-BAR | LIMITED LIFETIME WARRANTY & CARE, STORAGE, SHARPENING

KA-BAR* Knives, Inc. (the "Company") warrants, to the original purchaser of the product only, that this product will be free from defects in material and craftsmanship under normal use and maintenance for the lifetime of the original purchaser. This Limited Warranty does not apply to any failure of, defect in, or damage to the product caused by neglect, normal wear and tear, or by improper use, including throwing the product, batoning with the product, using the blades as a can opener, chisel, pry bar, screwdriver, digging tool, or for any heavy work for which the product was not designed.

If the product fails to satisfy this Limited Warranty, the Company will repair or replace the product or substitute a product of comparable value, at the Company's option, and such repair, replacement or substitution shall constitute the sole remedy for any failure of the product to satisfy this Limited Warranty or any implied warranty (ies) of the Company. In order to have a Limited Warranty claim evaluated by the Company, you must return the product, at your own expense and risk, to KA-BAR® Knives, Inc., at 200 Homer Street, Olean, NY 14760, attention Customer Service Department. Please include with the returned product a brief written description of any claimed defect(s) in or failure(s) of the product. Any returned product determined by the Company to not be eligible for repair, replacement or substitution under the terms of the Limited Warranty will be returned to

The Company makes no express warranty or representation whatsoever of or with respect to the product other than the foregoing limited warranty, and all such other express warranties are hereby expressly excluded. Any implied warranties of the Company, including warranties of merchantability and fitness, are limited in duration to the duration of this limited warranty. The Company will not be liable for any special, incidental, or consequential damages, and all such damages are expressly excluded.

Some states do not allow limitations on how long an implied warranty lasts, or exclusion or limitation of incidental or consequential damages, so the above limitations or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary state to state.

Care for Your KA-BAR®

Wipe blades after use with a dry, soft cloth. If knives are exposed to salt water, wash with mild dish detergent, rinse with tap water, then wipe with a dry, soft cloth.

Storing

Treat blade with a light coating of mineral oil before storing in a dry area separate from its sheath. If possible, store in paper sleeve provided with the knife at purchase.

Sharpening

Keep knives sharp by touching up edges as needed. Most KA-BAR* knives can be sharpened using an Arkansas stone or commonly available sharpening system. Most knives can easily be touched up using a coarse or hard stone.

When bringing back a very dull edge, a coarse or hard stone should be used first, followed by a finer, softer stone.

Knives made with D2 steel require diamond or ceramic sharpeners. Knives should at no time be sharpened on a belt sander or bench grinder. These machines ruin a factorysharpened edge.
